

## Greater Than the Sum of Its Parts

*Pre-Specified and Packaged Constant Pressure Systems for Residential Well Water*

### Contractor-Friendly

*Maintain constant water pressure for submersible well pump systems, similar to municipal water systems*

- PENTEK Submersible Motor
- Myers® Submersible Pump
- PENTEK INTELLIDRIVE™ Variable Frequency Drive

The PENTEK INTELLIDRIVE Water Pressure Control Center automatically adjusts motor speeds to meet changes in water demand.

Instantaneous feedback from an electronic pressure transducer instructs the drive to change the submersible well pump motor speed to maintain constant pressure throughout the system.

**1**

#### PENTEK Submersible Motor

- Built with the latest design, manufacturing and testing technology
- Encapsulated stainless steel design and professional-grade insulation provide longer life in harsh environments
- 100% factory pressure- and run-tested

**2**

#### Myers Submersible Pump

- Submersible pumps deliver efficient and dependable performance even in rough, aggressive water
- One of the few manufacturers of both pumps and pressurized water storage tanks, now sold in over 100 countries

**3**

#### PENTEK INTELLIDRIVE Variable Frequency Drive

- Maintains constant pressure output regardless of fluctuating demand
- Extends life of pump and motor
- Utilizes a smaller pressure tank for a space-saving solution
- Energy savings from managed speed

**1** + **2** + **3** =

*The convenience of a ready-made kit – pre-specified to include the components you need!*

**60Hz NEMA 1 Kit**

**Note:**  
80Hz Kits utilize an undersized liquid end running at higher speed to match pump performance of the curve equivalent to the driving motor. Maximum life expectancy of the liquid end is obtained using 60Hz solutions.
